Art Unit 1752

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-5, drawn to a radiographic panel, classified in Class 430, subclass 495.1.

II. Claims 9-12, drawn to a radiographic panel with bent support, classified in Class 430, subclass 496.1.

The inventions are distinct, each from the other because of the following reasons:

The panels of Groups I and II are directed to independent inventions including mutually exclusive radiographic image panels. The panels of Group I are made by controlling the temperature of supports during vapor deposition and the panels of Group II are made by vapor deposition on bended supports. Group I does not use bended supports; and Group II does not have heating or cooling of supports.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Any inquiry concerning this communication should be
